## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

The invention comprises species herein numbered as species 1-11. Each of the the species comprise a flame resistant polyester fiber comprising a polyester, a polymer alloy, a phosphorus based flame resistant agent and a phosphite based compound as set forth below:

Species 1 is wherein the above fiber comprises component ( C ) of formula 2

Species 2 is wherein the above fiber comprises component ( C ) of formula 3

Species 3 is wherein the above fiber comprises component ( C ) of formula 4

Species 4 is wherein the above fiber comprises component ( C ) of formula 5

Species 5 is wherein the above fiber comprises component ( C ) of formula 6

Species 6 is wherein the above fiber comprises component ( C ) of formula 7

Species 7 is wherein the above fiber comprises component ( C ) of formula 8

Species 8 is wherein the above fiber comprises component ( D ) of formula 9

Species 9 is wherein the above fiber comprises component ( D ) of formula 10

Species 10 is wherein the above fiber comprises component ( D ) of formula 11

2. Species 11 is wherein the above fiber comprises component ( D ) of formula 12.

Art Unit: 1714

3. A telephone call was made to Richard Lione on 6/29/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

The following claim(s) are generic: Claim 1 is generic.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The individual species lack unifying structural specificity, particularly when the phosphorus species is reactive. Each species is capable of possessing distinct functional characteristics.

Art Unit: 1714

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
